

Geolocation Dispatch Mgr: Android

You can Geolocate Users on a Map if you are assigned as Mobile Dispatcher for specific users by your company administrator. Users must have Location Services "ON" in phone settings and "Allow Company to Track me" In App Options

1. You can view individual contacts or Groups on a map – start on contact page – hold a long press on your contact or Group.

2. Press Geolocation to display location details of User or several users within a Group/Channel. Click on 'Details' to see more info.

3. The Geolocation "Icon" is also displayed on many other screens while in application.

4. Contact list page, while on call or conversation

5. If location services are turned off on Phone or network issues (no signal), this will be noted on user details.
